### ABSTRACT:

A revolutionary road scheme for the development and development of India through the centenary of the country's independence is a visionary review of India for the sustainable improvement of India. The goal of this ambitious vision is to build a country that is socially inclusive, economically stable and environmentally durable. The purpose is to address the challenging circumstances and opportunities of the Viksit India 2047, which is based on the principles of development and equity, by fusing social welfare, environmental protection and economic success. Promoting entrepreneurship, developing technological innovation, and a skill-reforming economy is an important foundation of this vision. The value of incorporating in the distorted India 2047 has been emphasized, with focusing on the empowerment of adolescents, uplifting weaker people and reducing inequalities in areas and places. The purpose of this vision is to establish India as a global leader in permanent and justified development through cooperative efforts between public and commercial areas as well as civil society. Not only Viksit India 2047 is a successful development route, but it also shows India's commitment to create a rich, inclusive and flexible future for its entire people.

### KEYWORDS:

Economic Expansion, Self-Sufficiency, Environmental Stability, Technological Innovation, Good Governance, Viksit Bharat

.....

### Introduction:

Viksit India 2047 is a financial, social and political objective. It asks to bring transformative alternative to the collective efforts of the residents, officers and civil society. This task includes promoting inclusion, reducing inequality, promoting education and talent improvement, improving healthcare, ensuring environmental stability and keeping cultural backgrounds. As an expert of overall progress, India aims to build a

society that thrives on equity, innovation and shared prosperity for all its people. Policy structures, technological progress, socio-economic strategies, environmental protection measures, adoption of renewable energy sources, infrastructure scheme, and public fitness enhancement that support India's stability goals for 2047 are likely to investigate in relevant literature. The work of scholars can check for anticipated change in population, characteristics of urbanization, climate-gained agriculture, water resources management, air quality development initiative, efficient production, efficient waste management systems, increase in access to healthcare and to focus on appropriate skills for future. When combined with digital changes of other industries, those study areas may be required to understand the vision and future of "Viksit India 2047". India's economy remained primarily agriculture, but British colonial has an impact on techniques such as railway, telegraph and better port facilities, which facilitates change, but also enabled less difficult extraction and export of sources. This period saw great exploitation of herbal and human property, which led to the establishment of a widespread socio-monetary interval and monetary dependence on Britain. After attaining independence, India faced a complex challenge to rebuild and address the social and monetary inequalities inherent in colonial rule. The authorities carried out a series of policies and programs with the aim of promoting land reforms, industrialization, poverty comfort, schooling and development of infrastructure, reducing socio-financial inequalities and laying the foundation of a modern state.

**Objectives:**

- To study the concept of Viksit Bharat
- To perceive the Indian sustainable growth through Viksit Bharat

**Research Methodology:**

The nature of this investigation is illuminating. Numerous websites, including those operated by the Indian government, newspapers, periodicals, and other publications, provided the necessary secondary data.

**India launched towards economic liberalization:**

In the nineties of nineteen nineties, a more open, marks a major change towards the market-ranked economic system. This reform era introduced large -scale policy amendments, which recommend foreign trade

and funding, aimed at fully combining India in the global financial system. Major reforms protected to reduce import price lists, reduce restrictions on foreign direct funding (FDI) and closure licensing boundaries in various industries. This liberalization facilitated the boom of areas such as IT, telecom and motor vehicle manufacturing, making India an attractive holiday place for global organizations. To make some prevailing access to virtual prasad, to brid down virtual divide and promote technology in various fields, such as promoting school education, healthcare, governance and commerce.

### **Long –term prosperity:**

Additionally, India should focus on inclusive growth, ensuring that each region and groups benefit from the development of the country. Strengthening governance, promoting a virtual economy, and selling entrepreneurship can be important in creating a dynamic, competitive and flexible state. Through taking advantage of its strength in technology, agriculture and human capital, India can re –work in a fact to an advanced United States through 2047.

### **India’s curriculum to progress– an important opportunity:**

#### **Important twist point**

It is the Amrit period in India, which is a decisive period in the history of the state. India is currently deployed for the time of prolonged progress after significant adjustment in various fields (continuous improvement in India, N.D.). Significant increase in social and financial infrastructure has been for new policies and overall crests, universities, IITs, IIMs, medical and nursing schools, and the Prime Minister’s Kaushal Vikas Yojana (PMKV) due to skill development, for others.

Amazing progress is also infiltration in rural India. Regular insurance in essential services like energy, drinking water, bank accounts, road connectivity and mobile services is something that is working towards the nation or has already completed. Covering the gap of development, rural areas have started enjoying the same benefits of urban areas. To provide assistance and stability to rural poor, programs such as Prime Minister Garib Kalyan Anna Yojana and Mahatma Gandhi Nationwide Rural Employment Guarantee Act (MGNREGA) were necessary.

India has seen significant growth including rapid increase in mobile phones and internet uses. 30 crore UPI users and over 1,000 crore

transactions per month, the Unified Bill Interface (UPI) environment has experienced a meteorite growth and now accounts for more than 40% of all virtual transactions in India. Transport is now faster and more effective because for the expansion of India, including the introduction of Wande Bharat trains, including the construction of expressway and upgrade in the country's railway system. Additionally, the aviation industry has experienced remarkable expansion, in which air travel is reaching new heights. (Purohit, s.2024).

### **Monetary boom:**

Viksita India assumes the target of 2047 that a strong financial system is largely dependent on innovation, entrepreneurship and technology advancement. To ensure that the benefits of economic development are distributed to all aspects of society, the inclusive growth point of interest is important. Efforts can be made to close social and local intervals by creating opportunities to promote proper access to marginalized population and resources. Additionally, creating a competitive business environment, assisting small and medium –sized businesses (SMEs), and increasing the ease of conducting business will help create all jobs and improve the standard of living of citizens. With a look at the future, India is aimed at prosperity, which also benefits from every person as well as economic development.

### **Social advancement:**

Social development is the main emphasis of India 2047. According to the vision, social equality will be the cornerstone of national progress, healthcare will be provided as a fundamental right, and the admission of the school will often be. Important programs can focus on empowering girls, helping deprived groups and encouraging diversity and inclusion in all areas of society. The creation of a more fair society requires hygiene, improvement in social security systems, and affordable housing. Additionally, guidelines that promote capacity development, vocational schooling and entrepreneurship may be important in ensuring that each citizen is a U.S.A.

### **Sustainability of the environment:**

Viksit India 2047 promotes a stable and harmonic balance between economic growth and environmental protection, highlighting the significant importance of sustainable development. In order to reduce environ-

mental impact, vision gives a high priority on the development of practices in new technology, renewable energy sources and businesses. The purpose of the program is to improve power efficiency and reduce dependence on fossil fuels, as well as rapidly intensifying changes in renewable energy including hydroelectrics, air and solar energy. India's abundant biodiversity and promotion of natural resources may require strict environmental rules and use of protection principles

### **Innovation and generation:**

Viksit India is a firm commitment to take advantage of innovation and era as ride forces for the country's widespread improvement in the heart of 2047. Strategic investment (R&D) in studies and development, promoting a financial system promoting a learning method, and adopting emerging technologies is fundamental to reach this imaginative and presentation. The goal is that India is converted into operations worldwide in innovation in an surrounding environment that supports creativity, entrepreneurship, and solution in all fields. This vision promotes the construction of a strong foundation for entrepreneurs, promotes the advancement of state -of -the -art services and goods that can meet domestic and international needs. The objective of Viksit Bharat 2047 is to present the necessary infrastructure by presenting the necessary infrastructure, encouraging cooperation between business, academics and government to present the infrastructure required to cultivate an innovative subculture.

### **Suitable government:**

Viksit India promotes 2047 accurate regime. Clear, accountable and responsible governance practices can be imaginative and important for presentation, as they are important to develop a machine that works for people. This vision focuses on improving the methods of bureaucracy, simplifying administrative methods and reducing Crimson tape to increase performance and effectiveness in public administration. Anti -corruption measures can be increased, ensuring that public sources are used responsibly and transparently. In addition, improving the efficiency of public institutions is a top priority to improve the efficiency of public institutions and convert it into services in a well and powerful manner. Participation in civil engagement and selection methods can be advocated through virtual structures, ensuring that the authorities have shown the wishes and aspirations of the people.

**Viksit Bharat 2047 represents India's profound:**

Commitment to constructing a destiny this is economically resilient, socially just, environmentally aware, and ruled with integrity.as the state procedures its one centesimal year of independence, this formidable vision captures the collective hopes and aims of over one thousand million citizens, united of their pursuit of a advanced and ahead-looking India (Chopra, R., & Bisht, C., 2024). This initiative isn't handiest approximately financial boom however additionally about fostering an inclusive society in which possibilities are available to all and progress touches each nook of the state. I honor India's wealthy history while advancing in the direction of a destiny that is globally competitive and inclusive. Through unwavering dedication and collaboration, this imaginative and prescient seeks to transform India right into a beacon of progress, resilience, and harmony—creating a legacy that truly displays the spirit of a thriving and empowered kingdom.

**Conclusion:**

India hopes to incorporate social inclusion, environmental restoration, and economic growth into its sustainable improvement strategy with the help of 2047. However, there are still significant issues, such as poverty, disparity in earnings, and the need for increased technical advancement. Though achieving this vision will require active youth participation, a comprehensive weather movement, and strong legislative support, the United Nations Sustainable Development Goals are closely aligned with the vision of Viksit Bharat 2047. Likewise, it might be essential to prioritize building resilient infrastructure, enhancing rural-urban connectivity, and fortifying public health and educational systems. India aims to set an example for sustainable behaviors by emphasizing renewable energy, the green era, and responsible aid management. Using its centenary year of independence, this ambitious goal would position India as a leader in sustainable, inclusive, and equitable growth through sector-wide collaboration, continuous policy reform, and a commitment to adapting to changing global norms.
